Polyethylene terephthalate (PET) is a thermoplastic resin from the polyester family, widely used in food and beverage containers due to its high clarity and durability. They are crack-resistant, freeze/heat resistant (-22°F to 180°F), and available in a wide range of sizes from 3 oz. to 32 oz., with various lid options including strawless, flat, dome, half-moon, wide opening, or with/without hole. RPET cups offer an eco-friendly alternative for those seeking environmentally conscious options. They are available in 12 oz. to 24 oz. sizes with flat and dome lids. Everything is BPA-free and ready for custom printing. Cups are designed for cold beverages only. For safety, the recommended temperature range is -17°F to 140°F.
