## Cedar Grove/CMA-I Acceptance Notification

August 21, 2018

Vincent Wu  
Lollicup USA  
6185 Kimball Ave.  
Chino, CA 91708

Dear Vincent,

Thank you for your continued commitment to developing commercially compostable food service packaging in support of zero waste programs, and for working directly with compost manufacturing facilities to ensure products you manufacture are acceptable in real world operations and processes.

The Compost Manufacturing Alliance has conducted field testing on products submitted for review at Cedar Grove's covered, in-vessel aerated static pile system in Everett, Washington. The results of test EV78 are completed, and we are pleased to inform you that the following item(s) you recently submitted are now accepted and are considered compostable at Cedar Grove Facilities.

Product ID#	Product Description
KE-P200-PLA	2oz PLA Portion Cup
KE-P400-PLA	4oz PLA Portion Cup
KE-PL400-PLA	4oz PLA Portion Cup Lid

Please note that accepted items are suitable for commercial collection, but may not be suitable for residential curbside collection. Cedar Grove Composting and the Compost Manufacturing Alliance reserve the right to require periodic re-evaluation for recertification as early as one year after date of initial acceptance.

If you have any questions or require any additional information, please contact the Compost Manufacturing Alliance by e-mail at [testing@composterapproved.com](mailto:testing@composterapproved.com).

Sincerely,

Christine Smith  
Office, Sample and Documentation Specialist
