Polypropylene (PP) is usually semi-translucent and compared to Polyethylene Terephthalate (PET) that has a lower degree of clarity. Our Karat<sup>®</sup> PP cups are thinner for a higher degree of clarity than average translucent cups. Translucent plastic PP cups can hold up against temperatures of up to 200° F. Besides being heat resistant, PP is durable as well as oil and chemical resistant. Translucent PP cups are widely used for cold drinks such as iced teas, fountain drinks, slushes and more. PP is commonly recycled. It's resin identification is 5. Polystyrene (PS) is light-weight and economical. PS is recyclable.
